

MARRIOTT

ENVIRO MANAGEMENT SERVICES

Enviro Management Services has been operating within the horticultural, landscape and environmental industry for the past 28 Years. Excellence in customer service and satisfaction has been achieved through the application of our core values of Professionalism, Collaboration, Respect, Integrity, and Innovation. With our commitment to a safe workplace, the environment and continuous improvement we have carved out a reputation of reliable, consultative project delivery.

Our team of project managers, environmental scientists and horticulturists provide a range of services including but not limited to environmental weed control, vegetation management, landscaping, grounds maintenance fuel load reduction works and GIS data collection and collation, for government and the private sector.

DELIVERING SERVICES

At Enviro Management Services, we operate on a simple philosophy: **“Do it right the first Time”**. Through open, honest and transparent communication with our clients we deliver projects that balance the need to achieve short term deliverables with a whole of life approach ensuring long term viability.

SAFE WORK PRACTICES

Ensuring the safety of our staff and the community in which they work is paramount. Our sustainable work practices see everyone having a role to play in actively delivering safer, smarter and environmentally sensitive solutions within the workplace while sharing our learnings for all to benefit.

RISK MANAGEMENT STANDARDS

Enviro Management Services is an organisation that understands the importance of risk management. Accreditations for quality (ISO 9001:2008) and safety (AS/NZS 4801:2001) form a significant cornerstone to our operations. Our commitment to systems which ensure compliance maintain our standards of operation.

OUR PEOPLE

Enviro Management Services staff are qualified and experienced industry professionals who receive on-going training and development to ensure best practice operations. Staff are trained in OH&S procedures and processes including safe work methods and safe work practices, while being regularly informed of safety and operational changes through weekly toolbox meetings.
